Errata: *Matching Adjacent Cards**

Kent E. Morrison

In the appendix the first block of Mathematica code should be

```
deck = Flatten[Table[{i, i, i, i}, {i, 1, 13}]];
matches = {};
Do[s = RandomSample[deck, 52];
   AppendTo[matches, Count[Differences[s], 0]], {100000}];
Mean[matches]
Histogram[matches, {1}, "Probability",
          Ticks->{Range[0,13],Automatic}]
```

The only correction is that in the third line `deck` replaces `Range[52]`.
